

Nolan Little

Full Stack Web Developer

MY BACKGROUND

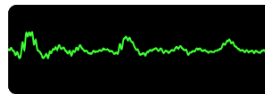

My path to web development has not been a straightforward one. While computers have been a part of my life from a young age I had never tried my hand at programming. The start of the path may have been my college study of Music Business with a focus on Audio Engineering. In the course of my degree I completed an independent study using Pure Data, a graphic programming interface to create a fully software driven effects pedal. At the time, I had no idea I was learning general programming concepts or even what that would have meant. Now that interest has come full circle. Learning web development has given me the opportunity to exercise the logical side of myself as well as employ my creative spirit to solve problems, and to impact and help others.

MY JOB SKILLS

- HTML5, CSS3, javascript, React.js
- Grunt and browserify
- JSON server
- Relational Databases
- Basic Electronics, soldering, simple circuits.
- Eagle Scout
- Extensive teaching/training experience
